

Portfolio Color & Type System

Hand this to Claude Code as the source of truth for the dark theme.

Base • #0A0A0B
Accent • #FF6A33
WCAG AA target • 4.5:1

01 / SURFACES & ELEVATION

Base #0A0A0B oklch(.16 0 0) Page background	Surface #141416 oklch(.20 .004 285) Cards, nav	Elevated #1C1C20 oklch(.24 .005 285) Hover, popovers	Border rgba(255,255,255, alpha 10%) Hairline dividers

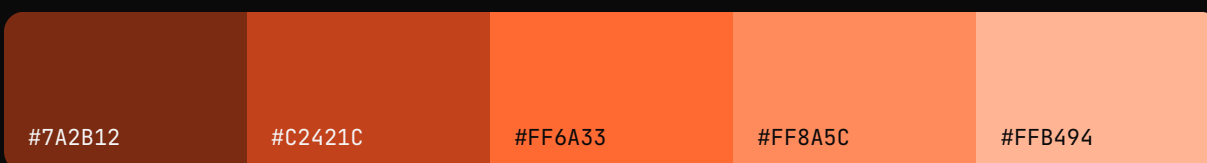

Don't use pure #000000 – it causes halation against light text. Base sits at #0A0A0B; each layer up lightens ~3-4% for depth.

02 / TEXT COLORS – THE PART YOU ASKED ABOUT

ROLE	HEX	OKLCH	CONTRAST	USE FOR
Headline / Hi-emphasis	#F4F4F5	oklch(.97 0 0)	18.2:1	H1-H3, key numbers
Body / Default	#D4D4D8	oklch(.87 .003 285)	12.4:1	Paragraphs, UI text

Secondary	#A1A1AA	oklch(.71 .004 285)	6.8:1	Captions, sub-labels
Muted	#71717A	oklch(.55 .005 285)	3.9:1	Meta, large only
Disabled	#52525B	oklch(.44 .005 285)	2.4:1	Disabled / decorative
Accent text	#FF6A33	oklch(.70 .19 38)	4.9:1	Eyebrow, links ≥16px

03 / ACCENT SCALE

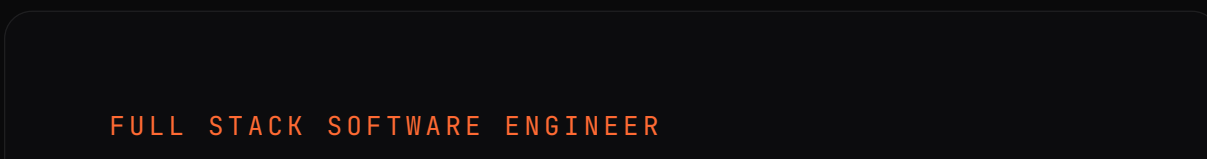

Accent **#FF6A33** for CTAs, eyebrow, stat numbers, link hovers. As **text**, only use it ≥16px / bold – orange on dark dips below AA at small sizes. Keep accent under ~10% of the surface.

04 / TYPE PAIRING

DISPLAY / HEADLINES Ship With Purpose Keep your graffiti font for the hero H1 only. Use Space Grotesk 700 for every other heading.	BODY / UI • JETBRAINS MONO I design solutions, build scalable systems, and ship production-grade software. Body at #D4D4D8 (not the dim gray in the current build). Min 15px, line-height 1.7+.
---	--

05 / APPLIED – FIXED HERO TREATMENT

Ship With Purpose

I design solutions, build scalable systems, and ship production-grade software — from backend microservices and cloud infrastructure to polished frontend interfaces.
